PHI-BONACCI DESIGN - is a multi-disciplinary Architecture ,Interior design & Engineering consulting firm.

Ours is a full - service boutique architecture – Interior design consulting practice & we are committed to excellence in custom design.

We collaborates with clients to create compelling design that resonates with meaning, clarity of intent and a strong sense of place. Our team approaches each design problem by examining and often reinterpreting the physical and social context of a particular site and program to find pragmatic yet unexpected solution

We are Modernists. We value beauty, efficiency, logic, pure expression of materials, and clean lines and forms that allows the architecture - the space, light, materials, spatial relationships – and its inhabitants to thrive.

The result is an Architectural – Interior spaces that are **C**urrent but **T**imeless, **S**erene yet **W**arm, & uniquely reflective of the values and characters of our clients.

We are thinkers  
and doers. We are  
visionary and  
grounded.  
We are design-  
focused and  
results-oriented.

PHI-BONACCI DESIGN is an architecture practice providing **INNOVATIVE** and **SUPERBLY CRAFTED** work for clients seeking thoughtful and well-considered design Solutions.

We believe that inspirational Architecture & Interiors enhance our lives. We consider that beautiful outcomes are achieved when there is nothing to add and nothing more to take away.

We do this through a collaborative partnership with Clients, We use our eyes to observe and our ears to listen - We develop a deep understanding of needs and aspirations - We creatively work with end users to explore possibilities, to challenge, and in turn to inspire - We synthesize, we resolve - Clients and their needs are at the heart of all that we do.

We Design, Document and Manage projects to craft the solution to your built environment needs.

At PHI-BONACCI DESIGN we are focused on a collaborative approach to design that leads to a built solution attuned to its purpose, as well as the broader issues of image and context.

Our design method begins by working closely with our client to understand the written and unwritten program and the complexities of the site.

We look for solutions that can have an impact beyond the project, that can move the needle in some way and contribute to **Society** and **Culture**.

## SERVICE VERTICALS

1. Architecture,
2. Industrial Architecture & Warehousing,
3. Interiors – Commercial & Residential,
4. Custom Made furniture's,
5. Retails & Exhibition Spaces.
6. Franchise and Branding

*Design is a balance  
between form and  
function, it takes two*

## ASSOCIATES & CONSULTANTS

## SCOPE OF WORK

### **Architecture**

Ideal project maintains a balance between the needs of the end user, the profitability of the project and the requirements of the urban environment. We create profitable projects that are value addition for the clients.

1. Master Plan analysis
2. Schematic design
3. Design development
4. Architectural visualization & animation
5. Construction Documents
6. Construction Supervision

### **Structural design**

Our structural engineering team collaborates with architects and MEP engineers while working on shared building information model. We avoid conservative solutions, instead we adopt structural system and materials efficiently with regard to structural integrity, reliability and cost effectiveness. By employing BIM technologies we reach high level of automation and reduce amount of rework and errors. It allows us to deliver high quality documents more accurately in less time.

1. Schematic Design
2. Design Development Phase
3. Working Documentations
4. Site Super vision

### **Concept**

Consulting is the shortest way to achieve the customer's goals. We offer individual solutions based on our practical experience and constantly developing knowledge. For each client, we are looking for the only true and profitable solution - a result that considers the prime interests of Client

1. Site analysis
2. Concept development
3. Forecasting trends

### **Interior Design**

We create a comfortable space for living and working, entertainment and education. High-quality and thoughtful design not only pleases the eye, but creates a healthy environment for a comfortable and intuitive use of the Spaces.

1. Sketch Style & mood Boards
2. Interior concepts
3. 3d Visualization
4. Design Project
5. Specification of Components & Material Selection
6. Detail Design Documentation
7. Site Supervision

### **MEP Engineering**

We offer innovative engineering solutions tailored to client's needs as efficient engineering always implies result-oriented strategic approach. We employ scientific knowledge and extensive experience while considering every aspect of facility construction and operation to provide rational and reliable design solutions.

1. Heating Ventilation & Air Conditioning (HVAC)
2. Plumbing
3. Fire fighting
4. Electrical engineering
5. Automated Building Management Systems
6. Mechanical Piping
